Safety Instructions

FAILURE TO FOLLOW THESE SAFETY INSTRUCTIONS MAY RESULT IN SERIOUS INJURY OR PROPERTY DAMAGE AND WILL VOID YOUR WARRANTY.

Owner must ensure that all players know and follow these rules for safe operation of this system.

To ensure safety, do not attempt to assemble this system without following the instructions carefully. Check the entire box and inside all packing material for parts and or other instruction material. Before beginning assembly, read the instructions and identify parts using the hardware identifier and parts list in this document. Ensure proper and complete assembly. Supervision is essential for proper operation and to reduce the risk of accident or injury. A high probability of serious injury exists if this system is not installed, maintained, and operated properly.

- If using a ladder during assembly, use extreme caution.
- Capable adults are recommended for this operation.
- Check base daily for leakage. Leaks will cause system to fall.
- Assemble the pole sections properly (if applicable). Failure to do so could cause the pole sections to separate during play or transport.
- Minimum operational height is 2.44m

Most injuries are caused by misuse and/or not following instructions. Use caution when using this system.

Warnings Please read this page carefully

Failure to follow these warnings may result in serious injury or damage to property.

Ensure all players follow these rules for safer operation of the system.

Do

Keep your face and mouth away from the rim and net during play. If your teeth or face come into contact with the rim and net, serious injury can occur.

When adjusting the height or moving the system, keep your fingers and hands away from the moving parts.

Ensure the surface beneath the base is flat and free of stones, gravel, or any other debris which may puncture the base, If leakage occurs the system may topple over.

Check system before each use for loose fittings, wear and tear or any other signs of instability. Tighten any loose fittings

Keep water and organic material away from the pole. The pole could rust and fail

Once a month check the pole and all metal parts for rust. Completely remove rust and repaint with exterior paint. If rust has penetrated any steel part, replace that part immediately

Do not

Do not wear jewellery during play, it may become entangled with the net.

Do not slide or climb onto the system standing upright without having filled the base with water or sand.

Do not use the system in windy or severe weather conditions. System may tip over. Place system in an area protected from the wind or in an area away from property that may be damaged if the system falls.

Do not use near overhead power lines.

Do not hang anything off the rim and do not use the system to lift or hoist anything.

NET1[®]

Step 7

Remove **(L) Base Cap**
and fill with either sand
or water, if filling with sand
a funnel is recommended.
Once completely full
replace **(L) Base Cap**

Filling the Base (requires 2 adults)

For safety reasons, we recommend that sand be used instead of water to fill the base. If a leak develops, water could run out unnoticed, allowing the system to fall over, resulting in personal injuries or property damage. Check the base carefully for leaks. If a leak is found, lay the system down on the ground and call customer services on 0115 985 3500 for assistance. Do not use, stand up, or play on a leaking system. When filling, moving, or playing on the system, always make sure the base is on a smooth surface free of stones or sharp objects that could puncture the base. If the system is to be used indoors, the base must be filled with sand.

Do Not allow water in the base to freeze. During sub-freezing weather conditions add a small amount of non toxic anti-freeze to the water to prevent freezing.
